

PUBLIFOR® HVM

Crash-tested surface-mounted hostile vehicle mitigation.

PROTECT YOUR CRITICAL ASSETS AND PEOPLE WITH OUR CRASH-TESTED RAPIDLY DEPLOYABLE BARRIER. BETAFENCE. REAL INNOVATION.

RAPID & RE-DEPLOYABLE PROTECTION

Publifer® is a versatile flexible security barrier when instant hostile vehicle protection or crowd control is needed.

A robust metal jersey barrier featuring Betafence's unique "tooth & pin" design provides exceptional stopping power in a flexible barrier.

A selection of security mesh panels, transparent shields or privacy panels are available to achieve the desired level of protection.

Publifer® is ideal for international and local events such as summits and sport fixtures and for quick cordoning off of sensitive areas.

- ✓ Mobile hostile vehicle mitigation
- ✓ Crash tested to IWA 14-1:2013 standards
- ✓ Classification: V/7200[N2A]/64/90:3.5
- ✓ Fast and simple to deploy and re-deploy
- ✓ Up to 25 m installed in 1 hour
- ✓ Unique "tooth & pin" design
- ✓ No opening in barrier after impact
- ✓ Various accessories and fence infill options

Critical Infrastructure

Rapidly deployed, easily installed and moved quickly

Publifor is quickly assembled on-site by placing the jersey barriers in place with a forklift, filling them with concrete or sand and then securing the pins, posts and panels.

Up to 25 m can be installed in 1 hour.

Easy Cornering

Angled jersey barriers on the protected side and flat surface on the attack side gives cornering flexibility in either direction.

The "tooth & pin" locking system maintains a corners' crash resistance.

Unique "tooth & pin" Design

Betafence's unique design increases Publifor's reliability in stopping hostile vehicles. An interlocking section is secured with a heavy duty steel pin, which keeps the line of barriers connected, even after impact.

Stepping

The play of 100 mm between 2 units allows for stepping.

Added Resistance

An 8 mm rubber layer fixed to the bottom of the barrier provides added friction in case of an attack, further increasing Publifor's stopping power.

Panel infills

Branding & Privacy Screens

Custom branding and / or privacy screens can be attached to the metal barrier and panels.
