EGIDIA® 3D PRIVACY – SWING GATES

THE SMART WAY TO INTEGRATE PRIVACY

Our popular **EGIDIA®** gate is now fully compatible with the privacy solutions already widely in use around homes and businesses. As you would expect from Betafence, it is well designed and easy to install.

Available with single or double wings, the **EGIDIA® 3D Privacy** gate is designed to be combined with **fences also installed with privacy slats**, creating a perfectly coherent **gate + fence** system. It delivers a **complete solution** that brings together **privacy, aesthetics, and visual continuity**.

THE EGIDIA® RANGE

EGIDIA® – A POPULAR, SIMPLE AND PROVEN RANGE

The **EGIDIA® Swing Gate** range is designed to meet all of your **swing gate** project needs, thanks to its **modular design** shared across all models:

- Common gate architecture
- Shared components and standard accessories
- Compatibility with different types of infill panels

SINGLE DESIGN DIFFERENT INFILLS

- SQ20 with 20mm x 20mm welded bars
- 2D with welded 2D panel
- 3D with welded 3D panel
- M50 with 50mm x 50mm welded mesh
- 3D Privacy to accommodate privacy slats
- Bekafor® Classic with Bekafor® Classic panel
- Zenturo® Super with Zenturo® Super panel

Installer Benefits

- One single design, multiple configurations means fewer references to manage and more flexibility on site
- Intuitive and fast installation
- Long lasting, high quality aluminium / stainless steel accessories
