BETAFENCE
a PRÆSIDIAD brand

BETAVIEW® 25

An attractive fence delivering reliable protection and aesthetic security.

Product detail

FEATURES & BENEFITS

Aesthetic design
Betaview 25 is an attractive fence delivering protection, a modern look, and quality in one complete system.

Larger apertures
Betaview 25 features larger apertures of 76 x 25mm when compared to our standard Betaview system (76 x 12mm). Reinforcing V bends across the panel increases its rigidity.

Visibility
Betaview 25 delivers excellent visibility through the fence and appears almost invisible from a distance, even at an angle. It is ideal for use with surveillance systems.

Compliant 3m wide panels
Panel widths meet the maximum distance requirement for electrical fence installation compliance.
Tamper resistant fixing mechanisms
Expertly designed posts and superior fixing mechanisms maintains the complete installation's integrity and resists against attempts to pry panels loose from the post.

Full system 10-year guarantee (standard terms & conditions apply)
Superior coatings underpin our 10-year anti-corrosion guarantee when the full system (panels, Bekafix Secure posts, and stainless steel fixators) is used.

Security level

LOW   HIGH

Applications

CAR DEALERSHIP | PUBLIC SPACES & BUILDINGS | EDUCATIONAL FACILITIES | COMMERCIAL PROPERTY | RESIDENTIAL

Functionalities

DELAY | DESIGN | DISSUASION

Panels

The panels are made from 3mm (3.4mm when PVC coated) diameter horizontal and 4mm (4.4mm when PVC coated) vertical ZincAlu® Super coated core wire.

The small apertures delays cutting and climbing attempts by enough time for security response teams to intercept and stop possible perpetrators.

Available in 3m wide panels and three standard height options. Other heights available on request.

Larger Aperture

Betaview 25 features a larger aperture (76.2 x 25.4mm) when compared to the standard design (76.2 x 12.7mm).

Durable High-Quality Coatings

Highly durable Zincalu® Super and optional PVC coatings guarantee an extra-long lifespan and low maintenance, delivering extreme protection in even the harshest environments.

Available in Zincalu® Super only or with an additional PVC coating on panels in green RAL 6005 or anthracite RAL 7021.

Posts & Fixing Mechanisms

Bekafix® Secure posts are specifically designed and engineered to be used in combination with Betafence's panels. With Bekafix Secure, the fence is safely tucked behind the lip of the post, resisting against attempts to pry the panel looset. The panels are secured to the post with specialised fixators, firmly bolted through the post using stainless steel security bolts and shear-off nuts that protect against tampering.

This combination of Betafence panels with Bekafix Secure post and superior fixing mechanisms delivers a complete fencing system that ensures the installation's integrity and protection levels.

Additional Security Accessories

Extended posts and brackets are available to accommodate additional security features such as electric fencing*, flat wrap razor, or BTC coil toppings.

*Supplied and installed by third parties.

Gates

For comprehensive access control solutions that ensure a uniform level of security throughout your perimeter, inquire about our fit-for-purpose range of swing and sliding gates.

Quality Assurance

Our range of high-security products are locally manufactured in our South African ISO 9001:2015 quality certified facility.

BETAVIEW 25 (SOUTH AFRICA)					
Nominal fence height (mm)	Panel width (mm) (centre-centre between posts)	Number of reinforcing V bends / panel	Post length (mm)	Number of fixators / post	Bolts, washers and shear-off nuts / post
